

# TMPN60A

Aug 2025

| Alloy                             | Ni                                              | Cr | Fe | Others   |
|-----------------------------------|-------------------------------------------------|----|----|----------|
| TMPN60A                           | Balance                                         | 16 | 15 | Si, B, C |
| <b>Powder Type:</b>               | Gas Atomized                                    |    |    |          |
| <b>Particles Sizes Available:</b> | -150/+45µm, -180/+53µm, and others upon request |    |    |          |
| <b>Typical Hardness:</b>          | 60 HRC                                          |    |    |          |
| <b>Apparent Density:</b>          | -                                               |    |    |          |
| <b>Flow Rate:</b>                 | -                                               |    |    |          |

**Application:**

- Petrochemical valves
- Plastic screws
- Oil pump plungers

**Process:**

- PTA (Plasma Transferred Arc)

**Hazards:**

Observe safe practices.

See TMetal material safety data sheet for details.

**Standard Sizes & Packaging:****Particle Size**

-150/+45µm,  
-180/+53µm

And others upon request

**Packaging**

5kg/ bottle
